

Mentee's Parent Testimonial

I just want to let you know that I am very grateful that Brian has been willing to invest time in my son's life. I have seen a big improvement in him. I have no words to explain how Brian has moved and touched our life by just stepping up and saying I will help. Not only has he changed and improved my son's self confidence and academics but has also changed our life. Brian is a true example of a great man. Because we come from a very dysfunctional background we have no positive role models, not one. Brian is the first male in my son's life that has shown him something positive and has demonstrated an interest that he just really cares, but most of all Brian has been there faithfully. That's a first in his young little life. That alone brings tears to my eyes. I can not tell you how happy I am with this program. Every time we see Brian we just want to hug him and tell him "thank you"!

I feel safe to say and know that (speaking from what Brian and Jen have showed us) my kids will not say "what happened to our mentors... why haven't they called." No matter how busy they are they have always made time and worked around our/their schedule to make the visit to help with school work.

Thank you, YMCA, Brian and Jen!
